HA tag Polyclonal antibody Catalog Number:51064-2-AP 933 Publications

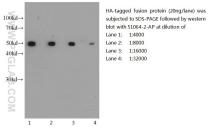

Basic Information	Catalog Number: 51064-2-AP	GenBank Accession Numl		ation Method: n affinity purification
	Size: 150ul , Concentration: 650 ug/ml by Nanodrop;	GeneID (NCBI): Full Name:	U	Recommended Dilutions:
		Calculated MW: 1 kDa	-	WB 1:5000-1:10000 IP 0.5-4.0 ug for 1.0-3.0 mg of total protein lysate IF/ICC 1:10-1:100
	Source: Rabbit	IKDa	•	
	Isotype: IgG			
Applications	Tested Applications: WB, IF/ICC, FC (Intra), IP, ELISA	Positive Controls:		
	Cited Applications:		WB : recombinant protein, Transfected HEK-293 cells	
	WB, IHC, IF, IP, CoIP, ChIP, ELISA		IP : Transfected HEK-293 cells, IF/ICC : Transfected HEK-293 cells,	
	Species Specificity: recombinant protein	IF		
	Cited Species:			
	human, mouse, pig			
Background Informatior		wing characteristics: solubi ds to amino acid residues YF ant proteins have been eng de biodistribution of the reco teins. The HA tag is useful i	lity, detection, purif YDVPDYA of humar ineered to express t ombinant protein. TI n western blotting a	ication, localization and ninfluenza virus he HA tag, which does not appenis tag facilitates the detection nd immunohistochemical
Background Information	Protein tags are protein or peptide se facilitates one or several of the follo expression. The HA tag is correspond hemagglutinin(HA). Many recombine to interfere with the bioactivity or the isolation, and purification of the pro- localization of expressed fusion prot	wing characteristics: solubi ds to amino acid residues YF ant proteins have been eng de biodistribution of the reco teins. This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

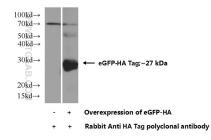

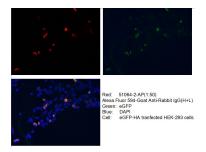

Western blot of HA-tagged fusion protein with anti-HA-tag (51064-2-AP) at various dilutions.

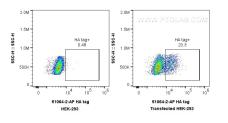

IP result of anti-HA tag (IP:51064-2-AP, 3ug; Detection:51064-2-AP 1:2000) with Transfected HEK-293 cells lysate 500ug.

Transfected HEK-293 cells were subjected to SDS PAGE followed by western blot with 51064-2-AP (HA tag antibody at dilution of 1:3000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of Transfected HEK-293 cells using 51064-2-AP (HA tag antibody) at dilution of 1:25 and Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).

1x10^6 Transfected HEK-293 cells were intracellularly stained with 0.25 ug HA tag Polyclonal antibody (51064-2-AP) and Coralite@488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2), and 0.25 ug Isotype Control. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
