NCKAP1 Polyclonal antibody

Catalog Number:12140-1-AP

10 Publications

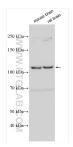

Basic Information	Catalog Number: 12140-1-AP	GenBank Accession Number BC015025	: Purification Method: Antigen affinity purification
	Size:	GeneID (NCBI):	Recommended Dilutions:
	150ul , Concentration: 200 µg/ml by	10787	WB 1:2000-1:16000
	Nanodrop and 133 µg/ml by Bradford method using BSA as the standard;	Full Name: NCK-associated protein 1	IHC 1:20-1:200 IF 1:50-1:500
	Source: Rabbit	Calculated MW: 129 kDa	
	lsotype: IgG	Observed MW: 115-125 kDa	
	Immunogen Catalog Number: AG2788	112-122 KD4	
Applications	Tested Applications:	Posit	tive Controls:
	IF, IHC, WB, ELISA	WB:	mouse brain tissue, rat brain
	Cited Applications: IHC, WB	IHC	human gliomas tissue, human heart tissue
	Species Specificity: human, mouse, rat	IF : n	nouse brain tissue,
	Cited Species: human, mouse		
	Note-IHC: suggested antigen r TE buffer pH 9.0; (*) Alternation retrieval may be performed w buffer pH 6.0	vely, antigen	
	NCK-associated protein 1 (NCKAP1), also known as NAP1 or HEM2, is encoded by an apoptosis-related gene human NAP1, the expression of which is strongly down-regulated in sporadic Alzheimer's disease (AD). Human NAP1 is predominantly expressed in neuronal cells. Antisense oligo DNA of human NAP1 transcripts was found to induce apoptosis of neuronal cells. Loss of NAP1 function disrupts neuronal differentiation. Likewise, NAP1 plays an essential role in facilitating neuronal cytoskeletal changes underlying the postmigratory differentiation of cortical neurons, a critical step in functional wiring of the cortex. Human NAP1 is also proved to be an orthologue of rat Nap1 which binds to the adaptor molecule NCK in signal transduction.		
Background Information	NAP1, the expression of which is stro predominantly expressed in neurona apoptosis of neuronal cells. Loss of N essential role in facilitating neuronal neurons, a critical step in functional v	l cells. Antisense oligo DNA c AP1 function disrupts neurona l cytoskeletal changes underl viring of the cortex. Human N	dic Alzheimer's disease (AD). Human NAP1 is of human NAP1 transcripts was found to induce al differentiation. Likewise, NAP1 plays an ying the postmigratory differentiation of cortical

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 12140-1-AP (NCKAP1 antibody) at dilution of 1:8000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (4% PFA) fixed mouse brain tissue using NCKAP1 antibody (12140-1-AP) at dilution of 1:200 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).

Immunohistochemical analysis of paraffinembedded human gliomas tissue slide using 12140-1-AP (NAP1;NCKAP1 Antibody) at dilution of 1:50 (under 40x lens).

Immunohistochemical analysis of paraffinembedded human heart tissue slide using 12140-1-AP (NAP1;NCKAP1 Antibody) at dilution of 1:50 (under 40x lens).
