

For Research Use Only

MYC-tag Monoclonal antibody

Catalog Number: 60003-1-Ig **21 Publications**

Basic Information

Catalog Number:	GenBank Accession Number:	Purification Method:
60003-1-Ig	GeneID (NCBI):	N/A
Size:	Full Name:	
150ul		
Source:		
Mouse		
Isotype:		
IgG1		

Applications

Tested Applications:
ELISA

Cited Applications:
IF, IP, WB

Species Specificity:
recombinant protein

Background Information

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. The c-Myc tag corresponds to amino acid residues(EQKLISEEDL) of the human c-Myc protein. It can be used for affinity chromatography, then used to separate recombinant, overexpressed protein from wild type protein expressed by the host organism. It can also be used in the isolation of protein complexes with multiple subunits. Myc-Tag mouse mAb detects recombinant proteins containing the Myc tag. The antibody recognizes the Myc-tag EQKLISEEDL fused to either the amino- or carboxy- terminus of targeted proteins.

Notable Publications

Author	Pubmed ID	Journal	Application
Yajie Chen	31570706	Cell Death Dis	
Jianing Tang	34645792	Cell Death Dis	WB,IP

Storage

Storage:
Store at -20°C. Stable for one year after shipment.

Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

*** 20ul sizes contain 0.1% BSA
