|                          | Reconstitution   | Reconstitution:   | Shipping:                                   |  |
| and Storage              | Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term storage.                             | The product is shipped at ambient temperature.                                  |   |  |
|                          | After reconstitution with sterile water, if glycerol has no effect                                     | Upon receipt, store it immediately at the recommended temperature (see below).  |   |  |
|                          | on subsequent experiments, it is recommended to add an   | recommended temperature (see betow).  |   |  |
|                          | equal volume of glycerol for long-term storage (see Stability  |   |   |  |
|                          | and Storage for more details).<br>If a different concentration is needed for your purposes please      |   |   |  |
|                          | adjust the reconstitution volume as required (please note: the   |   |   |  |
|                          | ion concentration of the final solution will vary according to   |   |   |  |
|                          | the volume used).  |   |   |  |
|                          | Note: Centrifuge vial before opening. When reconstituting,   |   |   |  |
|                          | gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. |   |   |  |
|                          |  |   |   |  |
| Stability and Storage    | Store for up to 12 months at -20°C to -80°C as lyophilized powder.                                     |   |   |  |
|                          |  |   |   |  |
| Storage of               | Short Term Storage:  |   |   |  |
| Reconstituted Protein    | Store at 2-8°C for (1-2 weeks).  |   |   |  |
|                          | Long Term Storage:<br>Aliquot and store at -20°C to -80°C for up to 3 months,                          |   |   |  |
|                          | reconstitution with sterile water and addition of an equal   |   |   |  |
|                          | volume of glycerol. Avoid repeat freeze-thaw cycles.   |   |   |  |
