|                          |  |   |  | After reconstitution with sterile water, if glycerol has no effect<br>on subsequent experiments, it is recommended to add an<br>equal volume of glycerol for long-term storage (see Stability<br>and Storage for more details).   | Upon receipt, store it immediately at the recommended temperature (see below). |
|                          |  |   |  | If a different concentration is needed for your purposes please<br>adjust the reconstitution volume as required (please note: the<br>ion concentration of the final solution will vary according to<br>the volume used).<br>Note: Centrifuge vial before opening. When reconstituting,<br>gently pipet and wash down the sides of the vial to ensure full |  |
