| | Reconstitution and Storage | Reconstitution: Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term storage. | Shipping: The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature (see below). | |
| After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). | | | | |
| If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to | | | | |
| the volume used). | | | | |
| Note: Centrifuge vial before opening. When reconstituting, | | | | |
| gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. | | | | |
| Stability and Storage | Store for up to 12 months at -20°C to -80°C as lyophilized powder. | | | |
