and Storage	storage.	Upon receipt, store it immediately at the recommended temperature (see below).	
	After reconstitution with sterile water, if glycerol has no effect		
	on subsequent experiments, it is recommended to add an		
	equal volume of glycerol for long-term storage (see Stability and Storage for more details).		
	If a different concentration is needed for your purposes please		
	adjust the reconstitution volume as required (please note: the		
	ion concentration of the final solution will vary according to		
	the volume used).		
	Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full		
	recovery of the protein into solution.		
Stability and Storage	Store for up to 12 months at -20°C to -80°C as lyophilized

Storage of	Short Term Storage:		
Reconstituted Protein	Store at 2-8°C for (1-2 weeks).		
	Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months,		
	reconstitution with sterile water and addition of an equal		
	volume of glycerol. Avoid repeat freeze-thaw cycles.
