Adiponectin Monoclonal antibody Catalog Number:66239-1-lg 7 Publications

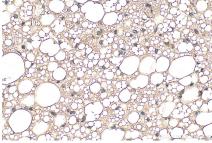

Basic Information	Catalog Number: 66239-1-lg			Purification Method: Protein G purification
	Size: 150ul , Concentration: 1000 ug/ml by	GeneID (NCBI):		CloneNo.: 5D8A7 Recommended Dilutions: WB 1:500-1:2000 IHC 1:200-1:800 IF/ICC 1:200-1:800
	Nanodrop; Source: Mouse			
	lsotype: lgG1			
	Immunogen Catalog Number: AG17383			
		Observed MW: 29 kDa		
Applications	WB, IHC, IF/ICC, ELISA		Positive Controls:	
			WB: human adipose tissue,	
	WB, IF Species Specificity:		IHC : rat brown adipose tissue, human placenta tissue human prostate cancer tissue, mouse brown adipose tissue, mouse skeletal muscle tissue, mouse skin	
	human, mouse, rat Cited Species: human, mouse, pig	tissue IF/ICC : 3T3-L1 cells,		L1 cells,
	Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0			
Background Information	Adiponectin (AdipoQ), an adipocyte-derived hormone, is one of the most abundant adipokines in the blood circulation. Adiponectin modulates a number of metabolic processes, including improving INS sensitivity and anti- inflammatory activity. The role of AdipoQ in reproduction is not yet fully understood, but the expression of AdipoQ in reproductive tissues has been observed in various animals and humans, including chicken testis, bovine ovary, and human placenta. Adiponectin exerts its effects by activating a range of different signaling molecules via binding to two transmembrane AdipoQ receptors, AdipoR1 and AdipoR2. AdipoR1 is expressed primarily in the skeletal muscle, whereas AdipoR2 is predominantly expressed in the liver. AdipoQ May play a role in cell growth, angiogenesis and tissue remodeling by binding and sequestering various growth factors.

Selected Validation Data

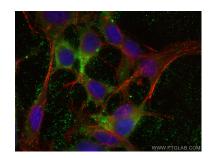

Immunohistochemical analysis of paraffinembedded rat brown adipose tissue slide using 66239-1-1g (Adiponectin antibody) at dilution of 1:400 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded rat brown adipose tissue slide using 66239-1-Ig (Adiponectin antibody) at dilution of 1:400 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

human adipose tissue were subjected to SDS PAGE followed by western blot with 66239-1-Ig (ADIPOQ Antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Ethanol) fixed 3T3-L1 cells using Adiponectin antibody (66239-1-Ig, Clone: 5D8A7) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L), CL594-phalloidin (red).
