

HumanKine[®] OSM (Recombinant Human)

Animal Component-Free	Human cell expressed	Tag-Free	Endotoxin Free
-----------------------	----------------------	----------	----------------

Product Description

Animal-free Recombinant Human Oncostatin M is expressed in human 293 cells as a monomeric glycoprotein with an apparent molecular mass of 30 kDa. This higher molecular mass is due to glycosylation and is not seen in the E. coli expressed form of this cytokine (22kDa). Glycosylation contributes to stability in cell growth media and other applications. This product is produced in a human cell expression system with serum-free, chemically defined media.

Alternative Names	oncostatin M, OSM
Source	Human Embryonic Kidney cells (HEK293). HEK293-derived OSM protein

Specifications

Test	Method	Specification
Activity	Dose-dependent stimulation of the proliferation of human TF-1 cells (human erythroleukemic indicator cell line)	Typically ≤ 1 ng/mL EC50
Molecular Mass	SDS-PAGE	30 kDa, monomer, glycosylated
Purity	SDS-PAGE	>95%
Endotoxin	LAL	<1 EU/ μ g

Activity Data

SDS-PAGE

Preparation	
Shipping Temperature	ambient temperature
Formulation	1x PBS, See Certificate of Analysis for details
Reconstitution	Briefly centrifuge the vial before opening. It is recommended to reconstitute the protein in sterile 1xPBS containing 0.1% endotoxin-free recombinant human serum albumin (HSA).

Stability and Storage	Product Form	Temperature Conditions	Storage Time (From Date of Receipt)
	Lyophilized	-20°C to -80°C	Until Expiry Date
	Lyophilized	Room Temperature	2 weeks
	Reconstituted as per CofA	-20°C to -80°C	6 months
	Reconstituted as per CofA	4°C	1 week
Avoid repeated freeze-thaw cycles.
