

Nur für Forschungszwecke

FUS/TLS Monoklonaler Antikörper

Katalog-Nr.: CL647-60160

Vorgestelltes Produkt

Allgemeine Informationen

Katalog-Nr.:	CL647-60160	GenBank-Zugangsnummer:	BC026062
Größe:	100ul, Konzentration: 1000 µg/mL von Nanodrop;	GenID (NCBI):	2521
Wirt:	Maus	Vollständiger Name:	fusion (involved in t(12;16) in malignant liposarcoma)
Isotyp:	IgG1	Berechneté Masse:	75 kDa
Immunogen Katalognummer:	AG2150	Beobachteté Masse:	75 kDa

Reinigungsmethode:
Protein-G-Reinigung

CloneNo.:
3A10B5

Anregungs-/Emissionsmaxima-
Wellenlängen:
654 nm / 674 nm

Anwendungen

Geprüfte Anwendungen:
FC (Intra)

Getestete Reaktivität:
Hausschwein, Human, Maus, Ratte

Hintergrundinformationen

FUS (also named TLS and POMp75) belongs to the RRM TET family. FUS may play a role in the maintenance of genomic integrity; it binds both single-stranded and double-stranded DNA and promotes ATP-independent annealing of complementary single-stranded DNAs and D-loop formation in superhelical double-stranded DNA. FUS is also an RNA-binding protein, and its links to neurodegenerative disease proffer the intriguing possibility that altered RNA metabolism or RNA processing may underlie or contribute to neuron degeneration. Two research groups simultaneously reported that FUS is present in 5% of the pathological aggregations (inclusions) seen in familial amyotrophic sclerosis (fALS). FUS-positive inclusions were also reported in cases of sporadic ALS (sALS). More recently, wild-type FUS has also been implicated in the pathological development of frontotemporal lobar dementia (FTLD) with ubiquitin-positive inclusions (FTLD-U), further linking FUS to the pathogenesis of neurodegenerative diseases. There is some debate as to whether FUS colocalizes with TDP-43 in TDP-43-positive cases of ALS and whether TDP-43 and FUS cause neurodegenerative disease independently or contributively of one another. This antibody is a mouse monoclonal antibody raised against an internal region of human FUS. Initial reports from our customers suggest this new monoclonal FUS antibody (60160-1-Ig) is a useful tool in ALS and FTLD research. For more details, please see our blog article regarding the matter.

Lagerung

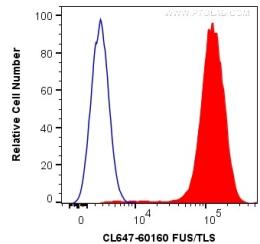

Lagerungsbedingungen:
Bei -20°C lagern. Vor Licht schützen. Nach dem Versand ein Jahr stabil.
Lagerungspuffer:
BS mit 50% Glycerin, 0,05% Proclin300, 0,5% BSA, pH 7,3.
Aliquotieren ist nicht notwendig bei -20°C Lagerung

*** 20ul-Größen enthalten 0.1% BSA

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Ausgewählte Validierungsdaten

1X10⁶ K-562 cells were intracellularly stained with 0.2 ug Coralite® Plus 647 Anti-Human FUS/TLS (CL647-60160, Clone:3A10B5) (red), or 0.2 ug APC-65124; APC Mouse IgG1 Isotype Control (APC-65124, Clone: MOPC-21) (blue). Cells were fixed and permeabilized with Transcription Factor Staining Buffer Kit (PF00011).
