Anticorps Polyclonal de lapin anti-PTPRM

Numéro de catalogue: **18315-1-AP**

Informations de base

Numéro de catalogue:	Numéro d'acquisition GenBank:	Méthode de purification:
18315-1-AP	BC051651	Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	
150ul , Concentration: 160 µg/ml by Bradford method using BSA as the standard;	5797	
Hôte:	Nom complet:	
Lapin	protein tyrosine phosphatase, receptor type, M	
Isotype:	MW calculé	
IgG	164 kDa	

Applications

Applications testées:
ELISA

Spécificité de l'espèce:
Humain, rat, souris

Informations générales

PTPRM, also named as hR-PTPu, R-PTP-MU, RPTPM and RPTPU, is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP possesses an extracellular region, a single transmembrane region, and two tandem catalytic domains, and thus represents a receptor-type PTP. The extracellular region contains a mepin-A5 antigen-PTP mu (MAM) domain, an Ig-like domain and four fibronectin type III-like repeats. This PTP has been shown to mediate cell-cell aggregation through the interaction with another molecule of this PTP on an adjacent cell. This PTP can interact with scaffolding protein RACK1/GNB2L1, which may be necessary for the downstream signaling in response to cell-cell adhesion. It may play as a key role in signal transduction and growth control.

Stockage

Stockage:
Stocker à -20°C. Stable pendant un an après l'expédition.
Tampon de stockage:
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3
L'aliquotage n'est pas nécessaire pour le stockage à -20C

*** Les 20ul contiennent 0,1% de BSA.
