# Anticorps Polyclonal de lapin anti- Phospho-PLC<sub>G1</sub> (Tyr783)

Numéro de catalogue: 29566-1-AP

## Informations de base

Numéro de catalogue:	BC144136	Méthode de purification:
29566-1-AP		Purification par affinité contre l'antigène
Taille:	Identification du gène (NCBI):	Dilutions recommandées:
100ul , Concentration: 600 µg/ml by Nanodrop;	5335	WB 1:500-1:2000
Hôte:	Nom complet:	
Lapin	phospholipase C, gamma 1	
Isotype:	MW observés:	
IgG	150 kDa	

## Applications

Applications testées:	Contrôles positifs:
WB, ELISA	WB : cellules Jurkat traitées à la λ phosphatase,
Spécificité de l'espèce:	
Humain	

## Informations générales

Phosphoinositide phospholipase C-gamma-1 (PLC<sub>G1</sub>) which belongs to the phosphoinositide-specific phospholipase C (PLC) family, is activated by many extracellular stimuli including hormones, neurotransmitters, and growth factors and modulates several cellular and physiological functions necessary for tumorigenesis such as cell survival, migration, invasion, and angiogenesis by generating inositol 1,4,5-triphosphate (IP3) and diacylglycerol (DAG) via hydrolysis of phosphatidylinositol 4,5-bisphosphate (PIP2) (PMID: 9242915). Phosphorylation is one of the key mechanisms that regulate the activity of PLC. PLC<sub>G</sub> is activated by both receptor and non-receptor tyrosine kinases (PMID: 2472218). PLC<sub>G</sub> forms a complex with EGF and PDGF receptors, which leads to the phosphorylation of PLC<sub>G</sub> at Tyr771, 783, and 1248 (PMID: 1708307). It has also been shown that PKA-mediated phosphorylation at Ser1248 is inhibitory to PLC<sub>G</sub> 1 tyrosine phosphorylation and phospholipase activity in CD3-treated Jurkat cells (PMID: 1370476), suggesting that Ser1248 may be an allosteric regulator of PLC<sub>G</sub> 1 activity.

## Stockage

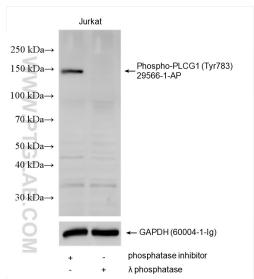

Stockage:	
Stocker à -20°C. Stable pendant un an après l'expédition.	
Tampon de stockage:	
PBS avec azoture de sodium à 0,02 % et glycérol à 50 % pH 7,3	
L'aliquotage n'est pas nécessaire pour le stockage à -20C	

\*\*\* Les 20ul contiennent 0,1% de BSA.

in USA), or 1(312) 455-8498 (outside USA)      E: proteintech@ptglab.com  
W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Données de validation sélectionnées

Phosphatase inhibitor treated and  $\lambda$  phosphatase treated Jurkat cells were subjected to SDS PAGE followed by western blot with 29566-1-AP (Phospho-PLCG1 (Tyr783) antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. The membrane was stripped and re-blotted with GAPDH antibody as loading control.
