

IHC your way.

Supporting all your IHC needs.

Proteintech offers a wide range of high-quality reagents for immunohistochemistry (IHC) including antibodies, kits, buffers and supporting products to help you achieve publication-worthy IHC data at highly competitive prices. We have products for supporting the IHC needs of a broad spectrum of IHC users ranging from beginners with no prior IHC experience to highly experienced researchers performing IHC experiments on a regular basis in their labs.

Proteintech's IHC portfolio includes

- ✓ Primary Antibodies for IHC
- ✓ IHC Prep & Detect Kits
- ✓ IHC Detect kits
- ✓ IHCeasy Kits
- ✓ Antigen Retrieval Buffers
- ✓ Hydrophobic IHC Pens

Primary Antibodies for IHC

Proteintech is a leading provider of antibodies with a wide selection of over 9,000 primary antibodies with demonstrated success in IHC applications. All our primary antibodies are developed and tested in each application by Proteintech scientists to ensure high specificity, with the broadest range of knockdown/knockout validated antibodies in the industry.

Top Cited Antibodies Validated for IHC

1,381 Citations

▲ IHC analysis of human glioma tissue using **10782-2-AP (TDP-43 antibody)** at dilution of 1:4000 (under 40x lens).

1,783 Citations

▲ IHC analysis of human kidney tissue using **19677-1-AP (Caspase 3 antibody)** at dilution of 1:200 (under 10x lens).

1,223 Citations

▲ IHC analysis of human tonsillitis tissue using **10366-1-AP (Vimentin antibody)** at dilution of 1:2000 (under 40x lens).

1,158 Citations

▲ IHC analysis of human liver cancer tissue using **18420-1-AP (P62,SQSTM1 antibody)** at dilution of 1:500 (under 40x lens).

our primary antibodies for IHC

▲ IHC analysis of paraffin-embedded human kidney using **17711-1-AP (ARL13B antibody)** at dilution of 1:50 (under 10x lens).

Species Reactivities

Majority of our primary antibodies are validated to work across multiple species:

- Human
- Mouse
- Rat
- Pig
- Monkey
- Zebrafish
- Rabbit
- Chicken
- Bovine
- Canine

Research Areas

We have antibodies to support research across a wide range of research areas:

- Cancer
- Cardiovascular
- EMT
- Developmental Biology
- Immunology
- Neuroscience
- Signaling

Clonalities

Our vast antibody portfolio features the following clonalities:

- Mouse Monoclonals
- Rabbit Polyclonals
- Rabbit Recombinant Monoclonals

Applications

In addition to IHC, many of our primary antibodies are validated to work in multiple applications:

- Western Blotting
- Immunofluorescence
- ELISA
- Flow Cytometry

IHC Prep & Detect Kits

IHC Prep & Detect Kits can be paired with any IHC validated primary antibody of choice for developing complete IHC workflows. Kit components include:

- Antigen retrieval buffer
- Washing buffer
- Blocking buffer
- Quenching buffer
- Primary antibody diluent
- Secondary antibody
- Chromogen component A
- Chromogen component B
- Signal enhancer
- Counter staining reagent
- Mounting media

Catalog No.	Product Name	Secondary Antibody Species Specificity	Size
PK100017	IHC Prep & Detect Kit for Rabbit Primary Antibody	Rabbit	50T
PK10018	IHC Prep & Detect Kit for Mouse Primary Antibody	Mouse	50T
PK10019	IHC Prep & Detect Kit for Rabbit/Mouse Primary Antibody	Rabbit/Mouse	50T

IHC Detect Kits

IHC Detect Kits are designed to facilitate highly sensitive chromogenic signal detection with reduced background staining. Kit components include:

- Quenching buffer
- Primary antibody diluent
- Secondary antibody
- Chromogen component A
- Chromogen component B

Catalog No.	Product Name	Secondary Antibody Species Specificity	Size
PK10009	IHC Detect Kit for Rabbit Primary Antibody	Rabbit	60T
PK10010	IHC Detect Kit for Mouse Primary Antibody	Mouse	60T
PK10006	IHC Detect Kit for Rabbit/Mouse Primary Antibody	Rabbit/Mouse	60T

▲ IHC analysis of mouse brain tissue using Proteintech's **TDP-43 rabbit recombinant antibody (80001-1-RR)** and IHC Prep & Detect Kit for Rabbit Primary Antibody (PK10017).

▲ IHC analysis of mouse pancreas tissue using Proteintech's **Insulin mouse monoclonal antibody (66198-1-Ig)** and IHC Detect Kit for Mouse Primary Antibody (PK10010).

IHCeasy Kits

IHCeasy kits are target-specific, complete IHC workflow kits with a pre-optimized primary antibody that can be directly applied to tissue sections saving time and precious samples. In addition, all other reagents needed for the entire staining workflow from antigen retrieval to mounting are included in these kits. Kit components include:

- Primary antibody
- Optional control slide
- Antigen retrieval buffer
- Blocking buffer
- Washing buffer
- Secondary antibody
- Chromogen
- Counter stain
- Signal enhancer
- Mounting media

▲ Human tonsillitis tissue stained with CD20 IHCeasy kit (KHC0018).

▲ Human kidney tissue stained with APOL1 IHCeasy kit (KHC0223).

IHCeasy kits have a broad target coverage across multiple research areas

- ✓ Adipose Tissue
- ✓ Cancer & EMT
- ✓ Epigenetics
- ✓ Immunology
- ✓ Kidney disease
- ✓ Muscular disorders
- ✓ Neuroscience
- ✓ Signaling
- ✓ Stem cell research

Antigen Retrieval Buffers

Proteintech offers a variety of pre-formulated antigen retrieval buffers for performing either heat-induced epitope retrieval (HIER) or protease-induced epitope retrieval (PIER) based on target antigen compatibility. We offer:

- Tris-EDTA Antigen Retrieval Buffer (PR30002)
- Citrate Antigen Retrieval Buffer (PR30001)
- Protease K Antigen Retrieval Buffer (PR30014)

▲ IHC analysis of human malignant melanoma tissue with Proteintech's **ALPP mouse monoclonal antibody (60294-1-Ig)**. Protease-induced epitope retrieval was performed by incubating at 37°C for 15 minutes in **Protease K Antigen Retrieval Buffer (PR30014)**.

▲ IHC analysis of human tonsillitis tissue with Proteintech's **CD8 mouse monoclonal antibody (66868-1-Ig)**. Heat-induced epitope retrieval was performed using **Tris-EDTA Antigen Retrieval Buffer (PR30002)**.

Hydrophobic IHC Pens

(PR30013)

Proteintech's hydrophobic IHC pens can be used for marking around the tissue sections on slides during IHC, thereby creating a water-repellent barrier around the tissues that prevents reagents from running off the slides. This helps reduce the unnecessary wastage of reagents during IHC.

Publish faster with Proteintech

Proteintech products have been cited over 200,000 times in journals worldwide and enable scientists to publish reliable and reproducible results.

Antibodies & Immunoassays

- Primary antibodies against 13,500+ human targets
- CoraLite® conjugated antibodies for immunofluorescence
- Secondary antibodies
- Loading control and isotype control antibodies
- NeutraKine™ neutralizing antibodies
- FlexAble Antibody Labeling Kits
- ELISA kits
- IHCeasy Ready-to-use kits
- Cell separation kits
- Western blot and flow cytometry supporting reagents

What makes Proteintech antibodies different?

- Developed and validated by Proteintech scientists
- Risk-free trial of antibodies for any species and any application with our Proteintech Guarantee
- Specificity verified by **KD/KO Validation**
- Lot-to-lot consistency
- Trial sizes available
