## For Research Use Only

## TIMP1 Polyclonal antibody Catalog Number: 16644-1-AP Featured Product

Featured Product

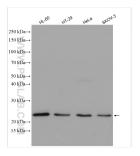

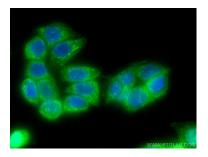

Basic Information	Catalog Number: 16644-1-AP	GenBank Accession Number: BC000866	Purification Method: Antigen affinity purification	
	Size:	GenelD (NCBI):	Recommended Dilutions:	
	150ul , Concentration: 500 ug/ml by	7076	WB 1:500-1:2000	
	Nanodrop;	UNIPROT ID:	IF/ICC 1:200-1:800	
	Source:	P01033		
	Rabbit	Full Name: TIMP metallopeptidase inhibitor 1 Calculated MW:		
	Isotype:			
	IgG			
	Immunogen Catalog Number: AG10006	23 kDa		
		Observed MW: 23 kDa		
Applications	Tested Applications:	Positive Controls:		
	WB, IF/ICC, ELISA	WB : HL	-60 cells, HT-29 cells, HeLa cells, SKOV-3	
	Cited Applications: WB, IHC, IF	IF/ICC : HT-29 cells,		
	Species Specificity:			
	human			
	Cited Species:			
	human, rabbit, bovine			
	TIMP1 is a member of the family of matrix metalloproteinase inhibitors, which contains four members (TIMP1, TIMP2, TIMP3, and TIMP4). Tissue inhibitors of metalloproteinases (TIMPs) are multifaceted molecules that exhibit properties beyond their classical proteinase inhibitory function. TIMP1 has several MMP-independent functions such as modulation of angiogenesis, promotion of cell proliferation, and inhibition of apoptosis. TIMP1 plays important role in cell cycle regulation and cancer progression. Recently, clinical studies have shown that the aberrant expression of TIMP1 is associated with an unfavorable prognosis in a series of tumors, such as gastric cancer, papillary thyroid carcinoma, cutaneous melanoma and breast cancer. In pregnancy, TIMP1 plays a regulatory role in the process of implantation, particularly the cytotrophoblast invasion of the uterine endometrium. In pregnancy, TIMP1 plays a regulatory role in the process of implantation, particularly the cytotrophoblast invasion of the uterine endometrium.			
Background Information	TIMP2, TIMP3, and TIMP4). Tissue inh properties beyond their classical pro as modulation of angiogenesis, prom role in cell cycle regulation and cance expression of TIMP1 is associated wi papillary thyroid carcinoma, cutaneous the process of implantation, particular TIMP1 plays a regulatory role in the p	ibitors of metalloproteinases (T teinase inhibitory function. TIMP notion of cell proliferation, and ir er progression. Recently, clinical th an unfavorable prognosis in a bus melanoma and breast cancer. arly the cytotrophoblast invasior	MPs) are multifaceted molecules that ex 1 has several MMP-independent function hibition of apoptosis. TIMP1 plays impor studies have shown that the aberrant series of tumors, such as gastric cancer, In pregnancy, TIMP1 plays a regulatory r of the uterine endometrium. In pregnance	
	TIMP2, TIMP3, and TIMP4). Tissue inh properties beyond their classical pro as modulation of angiogenesis, prom role in cell cycle regulation and cance expression of TIMP1 is associated wi papillary thyroid carcinoma, cutaneous the process of implantation, particular TIMP1 plays a regulatory role in the p	ibitors of metalloproteinases (T teinase inhibitory function. This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 16644-1-AP (TIMP1 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. Immunofluorescent analysis of (4% PFA) fixed HT-29 cells using TIMP1 antibody (16644-1-AP) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L).
