IRS1 Polyclonal antibody

Catalog Number:17509-1-AP

Featured Product

Basic Information	Catalog Number: 17509-1-AP	GenBank Accession BC053895	Number:	Purification Method: Antigen affinity purification	
	Size:	GeneID (NCBI):		Recommended Dilutions:	
	150ul , Concentration: 500 µg/ml by	3667		WB 1:500-1:2000	
	Nanodrop and 300 µg/ml by Bradford	UNIPROT ID:		IP 0.5-4.0 ug for 1.0-3.0 mg of total	
	method using BSA as the standard;	P35568		protein lysate IHC 1:20-1:200	
	Source: Rabbit	Full Name:		IF 1:50-1:500	
		insulin receptor subs	strate 1		
	Isotype: IgG	Calculated MW:			
	Immunogen Catalog Number:	1242 aa, 132 kDa			
	AG11714	Observed MW: 160-185 kDa			
Applications	Tested Applications: Positive Controls:				
	FC, IF, IHC, IP, WB, ELISA		WB : A549 cells, HEK-293 cells, A431 cells, PC-3 cell		
	Cited Applications: IP : A549		IP : A549 cell	cells,	
	WB,IHC,IF,Dot blot			breast cancer tissue, human liver tissu	
	Species Specificity: human		IF : A549 cell	S.	
	Cited Species:			,	
	human, rat, mouse, pig, Megalobrama amblycephala				
	Note-IHC: suggested antigen ro TE buffer pH 9.0; (*) Alternativ retrieval may be performed w buffer pH 6.0	vely, antigen			
	Ins receptor substrate 1 (IRS1) was the first cloned and characterized member of the IRS family which are involved ins receptor (IR) and ins-like growth factor I receptor (IGF-IR) signaling. IRS1 is phosphorylated by ins receptor tyrosine kinase and is involved in various cellular processes including DNA repair fidelity, transcriptional activity, and cell growth can support tumor development and progression. Mutations in this gene are associated with type I diabetes and susceptibility to ins resistance. IRS1 has a predicted molecular weight of 132 kDa, however, as a resu of its extensive serine phosphorylation it separates on a SDS gel as a band of approximately 160-185 kDa.

Selected Validation Data

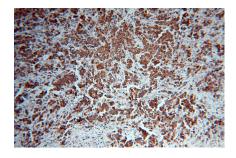

A549 cells were subjected to SDS PAGE followed by western blot with 17509-1-AP (IRS1 antibody) at dilution of 1:400 incubated at room temperature for 1.5 hours.

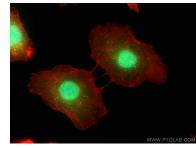

IP result of anti-IRS1 (IP:17509-1-AP, 5ug; Detection:17509-1-AP 1:1000) with A549 cells lysate 3500ug.

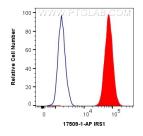

Immunohistochemical analysis of paraffinembedded human breast cancer using 17509-1-AP (IRS1 antibody) at dilution of 1:100 (under 40x lens).

Immunohistochemical analysis of paraffinembedded human breast cancer using 17509-1-AP (IRS1 antibody) at dilution of 1:100 (under 10x lens).

Immunofluorescent analysis of (4% PFA) fixed A549 cells using IRS1 antibody (17509-1-AP) at dilution of 1:200 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L), CL594phalloidin (red).

1X10^6 MCF-7 cells were intracellularly stained with 0.4 ug Anti-Human IRS1 (17509-1-AP) and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Isotype Control. Cells were fixed and permeabilized with Transcription Factor Staining Buffer Kit (PF00011).
