For Research Use Only

DYKDDDDK tag Polyclonal antibody (Binds to FLAG® tag epitope) Catalog Number:20543-1-AP 1137 Publications

	Catalog Number: 20543-1-AP Size: 150ul , Concentration: 600 ug/ml by Nanodrop; Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG2329	GenBank Accession Number: GeneID (NCBI): 8 Full Name: Flag Tag	Purification Method: Antigen affinity purification Recommended Dilutions: WB 1:20000-1:100000 IP 0.5-4.0 ug for 1.0-3.0 mg of total protein lysate
Applications	Tested Applications: WB, IP, ELISA Cited Applications: WB, IHC, IF, IP, CoIP, ChIP, RIP	Positive Controls: WB : Transfected HEK-293T cells, IP : Transfected HEK-293 cells,	
	Species Specificity: recombinant protein Cited Species: human, mouse, pig		
Background Information	Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. The DYKDDDDK(FLAG) peptide has been used extensively as a general tag in expression vectors. This peptide can be expressed and detected with the protein of interest as an amino-terminal or carboxy-terminal fusion. N-terminal DDDDK vectors provide an Ek cleavage site for removal of the fusion tag. The DDDDK peptide is likely to be located on the surface of a fusion protein because of its hydrophilic nature. As a result, the DDDDK peptide is more likely to be accessible to antibodies. A DDDDK-tag can be used in many different assays that require recognition by an antibody, such as western blotting, immunocytochemistry, immunoprecipitation, flow cytometry, protein purification, and in the study of protein-protein interactions, cell ultrastructure, and protein localization and so on. This antibody is a rabbit polyclonal antibody raised against 3xFlag (3xDYKDDDDKT) sequence and recognizes the (1x) and (3x)DYKDDDDK peptide and detects DDDDK-tagged proteins. Anti-FLAG is a registered trademark of Sigma-Aldrich Biotechnology.		
	more likely to be accessible to antib recognition by an antibody, such as w protein purification, and in the study so on. This antibody is a rabbit polyc the (1x) and (3x)DYKDDDDK peptide	vestern blotting, immunocytoch of protein-protein interactions, lonal antibody raised against 3	d in many different assays that require nemistry, immunoprecipitation, flow cytometry, cell ultrastructure, and protein localization and xFlag (3xDYKDDDDKT) sequence and recognizes

For technical support and original validation data for this product please contact: T: 1 (888) 4PTGLAB (1-888-478-4522) (toll free E: proteintech@ptglab.com in USA), or 1(312) 455-8498 (outside USA) W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

HEK-293T cells and transfected HEK-293T lysates were subjected to SDS PAGE followed by western blot with 20543-1-AP (DYKDDDDK tag antibody) at dilution of 1:50000 incubated at room temperature for 1.5 hours. IP result of anti-DYKDDDDK tag (IP:20543-1-AP, 4ug; Detection:20543-1-AP 1:10000) with Transfected HEK-293 cells lysate 400 ug.
