Background Information

FAM135A (family with sequence similarity 135) also known as KIAA1411, is a gene in the RP25 locus that is situated between D6S1557 and D6S421. FAM135A is expressed in the retina, brain, skeletal muscle, pancreas, and lung, according to gene expression studies. FAM135A is linked to several tumor-related pathways and is strongly correlated with breast cancer cell invasion and migration (PMID: 36943627).
