For Research Use Only

MST1 Monoclonal antibody, PBS Only

Catalog Number:66663-1-PBS

Featured Product

Basic Information

Catalog Number: 66663-1-PBS Size: 100ug , Concentration: 1 mg/ml by Nanodrop; Source: Mouse Isotype: IgG2a Immunogen Catalog Number: AG17738

GenBank Accession Number: BC093768 GeneID (NCBI): 6789 UNIPROT ID: Q13043 Full Name: serine/threonine kinase 4 Calculated MW: 487 aa, 56 kDa Observed MW: 52-56 kDa

Purification Method: Protein A purification CloneNo.: 2G11C1

Applications

Tested Applications: WB, IF, IHC, Indirect ELISA

Species Specificity: Human, Mouse , Rat

Background Information

Mammalian STE20-like serine-threonine kinase MST1, encoded by the STK4 gene, is a multifunctional protein. MST1 and its closest paralogs MST2 (encoded by the STK3 gene), MST3, and MST4 are members of the Class II Germinal Center Family of Protein Kinases . STK3/4 and LATS1/2 (large tumor suppressor 1 and 2) are core kinase components of the Hippo tumor suppressor pathway in mammalians . In the conventional Hippo pathway, the STK3/4 and LATS1/2 signaling cascade phosphorylates and inactivates the transcriptional coactivator YAP1 (yes associated protein 1) and its close paralog WWTR1]. YAP1 and WWTR1 do not have DNA binding domains and they exert their biological outputs, such as cell proliferation and survival, by interacting with the TEAD1-4 transcription factors. Lines of evidence have indicated that dysregulation or loss of STK4/Hippo signaling is linked to developmental disorders and carcinogenesis with poor prognosis. STK4 is a stress-induced kinase and it can be activated in response to cell-death inducers. Autophosphorylation of STK4 at Thr183 (Thr180 in STK3) in the activation loop is a key activation mechanism for STK4/3 because phosphorylation of Thr183/180 causes the cleavage of STK4 by caspases under apoptotic conditions. The caspase-cleavage results in a more active STK4 protein (STK4-N, an aminoterminally truncated STK4), which localizes into the nucleus and induces apoptosis through histone modifications and chromatin condensations.

Storage

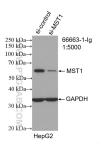

Storage: Store at -80°C. Storage Buffer: PBS Only

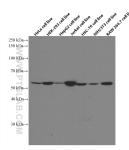

For technical support and original validation data for this product please contact:T: 1 (888) 4PTGLAB (1-888-478-4522) (toll freeE: proteintech@ptglab.comin USA), or 1(312) 455-8498 (outside USA)W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

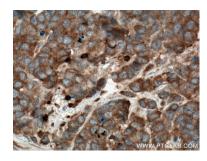

WB result of MST1 antibody (66663-1-1g; 1:5000; incubated at room temperature for 1.5 hours) with sh-Control and sh-MST1 transfected HepG2 cells. This data was developed using the same antibody clone with 66663-1-PBS in a different storage buffer formulation.

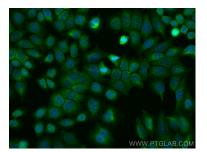

Various lysates were subjected to SDS PAGE followed by western blot with 66663-1-Ig (MST1 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 66663-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffinembedded human prostate cancer tissue slide using 66663-1-1g (MST1 antibody) at dilution of 1:500 (under 10x lens. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 66663-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffinembedded human prostate cancer tissue slide using 66663-1-1g (MST1 antibody) at dilution of 1:500 (under 40x lens. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 66663-1-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed PC-3 cells using MST1 antibody (66663-1-Ig, Clone: 2G11C1) at dilution of 1:400 and CoraLite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L). This data was developed using the same antibody clone with 66663-1-PBS in a different storage buffer formulation.
