Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 68575-1-Ig (IF144 antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated GAPDH Monoclonal antibody (HRP-60004) as loading control. This data was developed using the same antibody clone with 68575-1-PBS in a different storage buffer formulation.
