

For Research Use Only

RAB38 Monoclonal antibody, PBS Only

Catalog Number: 68603-1-PBS

Basic Information

Catalog Number: 68603-1-PBS	GenBank Accession Number: BC015808	Purification Method: Protein A purification
Size: 100ug , Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 23682	CloneNo.: 3A10C5
Source: Mouse	UNIPROT ID: P57729	
Isotype: IgG2a	Full Name: RAB38, member RAS oncogene family	
Immunogen Catalog Number: AG26440	Calculated MW: 211 aa, 24 kDa	
	Observed MW: 24 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
Human

Background Information

The RAB family of small GTPases is part of the Ras protein superfamily and is primarily responsible for regulating intracellular vesicle transport and migration. RAB38 is a recently identified member of the RAB family of proteins and its expression is tissue-specific. RAB38 is predominantly expressed in melanocytes and melanoma tissues, but not in other normal tissues, serving as a melanocyte differentiation antigen. RAB38 has also been reported to be upregulated in glioblastoma, and high levels of its expression are associated with a poor prognosis and enhanced cell migration.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS Only

For technical support and original validation data for this product please contact:
T: 1 (888) 4PTGLAB (1-888-478-4522) (toll free in USA), or 1(312) 455-8498 (outside USA) E: proteintech@ptglab.com
W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 68603-1-Ig (RAB38 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 68603-1-PBS in a different storage buffer formulation.
