

For Research Use Only

uPAR/CD87 Monoclonal antibody, PBS Only

Catalog Number: 68727-1-PBS

Basic Information

Catalog Number: 68727-1-PBS	GenBank Accession Number: BC002788	Purification Method: Protein A purification
Size: 100ug, Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 5329	CloneNo.: 2A3E8
Source: Mouse	UNIPROT ID: Q03405	
Isotype: IgG2b	Full Name: PLAUR	
Immunogen Catalog Number: AG28056	Calculated MW: 37 kDa	
	Observed MW: 35-50 kDa	

Applications

Tested Applications:
WB, IHC, Indirect ELISA

Species Specificity:
human

Background Information

uPAR is a highly glycosylated, GPI-anchored membrane protein. In addition to the membrane-anchored form, uPAR is released from the plasma membrane by cleavage of the GPI anchor and can be found as a soluble form (suPAR). uPAR contains three homologous domains (D1-D3) of which the N-terminal one (D1) represents the uPA-binding domain. After binding to uPAR, uPA cleaves plasminogen, generating the active protease plasmin which is involved in a wide variety of physiologic and pathologic processes. In addition to regulating proteolysis, uPAR has important function in cell adhesion, migration and proliferation. Studies reveal that uPAR expression is elevated during inflammation and tissue remodeling and in many human cancers, in which it frequently indicates poor prognosis. (PMID 20027185; 12461559)

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS Only

W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

U2OS cells were subjected to SDS PAGE followed by western blot with 68727-1-Ig (uPAR/CD87 antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 68727-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human lung squamous cell cancer slide using 68727-1-Ig (uPAR/CD87 antibody) at dilution of 1:500 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 68727-1-PBS in a different storage buffer formulation.
