

For Research Use Only

# Phospho-p70(S6K) (Thr229) Recombinant antibody, PBS Only

Catalog Number: 81592-1-PBS

## Basic Information

<b>Catalog Number:</b> 81592-1-PBS	<b>GenBank Accession Number:</b> BC053365	<b>Purification Method:</b> Protein A purification
<b>Size:</b> 100ug, Concentration: 1 mg/ml by Nanodrop;	<b>GeneID (NCBI):</b> 6198	<b>CloneNo.:</b> 2G19
<b>Source:</b> Rabbit	<b>UNIPROT ID:</b> P23443	
<b>Isotype:</b> IgG	<b>Full Name:</b> ribosomal protein S6 kinase, 70kDa, polypeptide 1	
	<b>Calculated MW:</b> 59 kDa	
	<b>Observed MW:</b> 65-85 kDa	

## Applications

**Tested Applications:**  
WB, Indirect ELISA

**Species Specificity:**  
Human

## Background Information

RPS6KB1 (Ribosomal protein S6 kinase beta-1) is also named as STK14A, p70 S6KA, and belongs to the S6 kinase subfamily. RPS6KB1 is a major substrate of mTOR and acts as a crucial effector of mTOR signaling pathway. It plays a key role in cell growth and proliferation by regulating INS sensitivity, metabolism, protein synthesis, and cell cycle. RPS6KB1 may play an important role in the progression of HCC and could serve as a potential molecular target for HCC therapy (PMID:22684641). The Rps6kb1 gene encodes the 70 kDa ribosomal protein S6 kinase (p70S6K). The PI3K/mTOR signalling pathway is one of the major mechanisms for controlling cell survival, proliferation, and metabolism and is the central regulator of translation of some components of the protein synthesis system. Due to alternative translation, two isoform S6K1 proteins are known to exist in mammalian cells: p85 S6K1 and p70 S6K1, which is identical to p85 S6K but lacks its first 23 amino acids. In addition, mammalian cells express a second S6K1 isoform spanning 316 amino acids (p31 S6K1).

## Storage

**Storage:**  
Store at -80°C.

**Storage Buffer:**  
PBS Only

For technical support and original validation data for this product please contact:

E: proteintech@ptglab.com  
W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Non-treated and IGF-1 treated MCF-7 cells were subjected to SDS PAGE followed by western blot with 81592-1-RR (Phospho-p70(S6K) (Thr229) antibody) at dilution of 1:40000 incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with 60004-1-Ig (GAPDH antibody) as loading control. This data was developed using the same antibody clone with 81592-1-PBS in a different storage buffer formulation.
