

For Research Use Only

# LAMR1/RPSA Recombinant antibody, PBS Only (Detector)

Catalog Number: 83495-6-PBS

## Basic Information

<b>Catalog Number:</b> 83495-6-PBS	<b>GenBank Accession Number:</b> BC050688	<b>Purification Method:</b> Protein A purification
<b>Size:</b> 100ug, Concentration: 1 mg/ml by Nanodrop;	<b>GeneID (NCBI):</b> 3921	<b>CloneNo.:</b> 240461B1
<b>Source:</b> Rabbit	<b>UNIPROT ID:</b> P08865	
<b>Isotype:</b> IgG	<b>Full Name:</b> ribosomal protein SA	
<b>Immunogen Catalog Number:</b> AG6033	<b>Calculated MW:</b> 33 kDa	

## Applications

**Tested Applications:**  
Sandwich ELISA, Indirect ELISA, Sample test

**Species Specificity:**  
human

## Product Information

83495-6-PBS targets LAMR1/RPSA as part of a matched antibody pair:

MP00494-4: 83495-1-PBS capture and 83495-6-PBS detection (validated in Sandwich ELISA)

Unconjugated rabbit recombinant monoclonal antibody in PBS only (BSA and azide free) storage buffer at a concentration of 1 mg/mL, ready for conjugation. Created using Proteintech's proprietary in-house recombinant technology. Recombinant production enables unrivalled batch-to-batch consistency, easy scale-up, and future security of supply.

This conjugation ready format makes antibodies ideal for use in many applications including: ELISAs, multiplex assays requiring matched pairs, mass cytometry, and multiplex imaging applications. Antibody use should be optimized by the end user for each application and assay.

## Background Information

The ribosomal protein SA (RPSA), previously named 67 kD laminin receptor (67LR), 37 kD laminin receptor precursor (37LRP) and p40 ribosome-associated protein, is a multifunctional protein, that plays a role in a number of pathological processes, such as cancer and prion diseases. It is overexpressed in various cancer cell lines, and the level of the laminin receptor transcript is higher in colon carcinoma tissue and lung cancer cell line than their normal counterparts. This antibody is a rabbit polyclonal antibody raised against full length RPSA of human origin. This antibody is specific to RPSA (LAMR1). 67LR derives from homo- or hetero- dimerization of a 37 kDa cytosolic precursor (37LRP), most probably by fatty acid acylation. 37LRP is mostly found in the cytosol and nucleus [10] where it is involved in translational processes and maintenance of nuclear structures, respectively. 67LR is localized at the cell surface and it not only serves as a receptor for LM but also acts as a receptor for elastin, carbohydrates and the cellular prion protein.

## Storage

**Storage:**  
Store at -80°C.  
**Storage Buffer:**  
PBS Only

**This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.**

## Selected Validation Data

Sandwich ELISA standard curve of MP00494-4, Human LAMR1/RPSA Recombinant Matched Antibody Pair - PBS only. 83495-1-PBS was coated to a plate as the capture antibody and incubated with serial dilutions of standard Ag6033. 83495-6-PBS was HRP conjugated as the detection antibody. Range: 1.56-100 ng/mL.

The mean LAMR1/RPSA concentration was determined to be 387.00 ng/mL in COLO 320 cell extract based on a 2.00 mg/mL extract load, 218.85 ng/mL in HeLa cell extract based on a 1.20 mg/mL extract load and 291.26 ng/mL in HEK-293 cell extract based on a 1.20 mg/mL extract load.
