

For Research Use Only

VPRBP Recombinant antibody, PBS Only

Catalog Number:83901-5-PBS

Basic Information

Catalog Number: 83901-5-PBS	GenBank Accession Number: BC022792	Purification Method: Protein A purification
Size: 100ug , Concentration: 1 mg/ml by Nanodrop;	GeneID (NCBI): 9730	CloneNo.: 241028B4
Source: Rabbit	UNIPROT ID: Q9Y4B6	
Isotype: IgG	Full Name: Vpr (HIV-1) binding protein	
Immunogen Catalog Number: AG2184	Calculated MW: 1506 aa, 169 kDa	
	Observed MW: 169 kDa	

Applications

Tested Applications:
WB, IF/ICC, FC (Intra), ELISA

Species Specificity:
human

Background Information

VprBP was first identified as a protein that can interact with HIV-1 viral protein R (PMID: 11223251). It is a component of the CUL4A-RBX1-DDB1-VprBP/DCAF1 E3 ubiquitin-protein ligase complex that could interact with HIV-1 virus Vpr protein and HIV-2 virus Vpx protein (PMID: 18332868; 17314515; 18606781). VprBP is a 1,507 amino acid protein that contains conserved domains, including YXXY repeats, the Lis homology motif, and WD40 repeats. Through binding to Vpr, VprBP allows Vpr to modulate the catalytic activity of the CUL4-DDB1 complex, which in turn leads to the induction of G2 phase arrest in the virus-infected cells (PMID: 17630831). Recently it has been reported that VprBP is able to regulate the p53-induced transcription and apoptotic pathway (PMID: 22184063).

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 83901-5-RR (VPRBP antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 83901-5-PBS in a different storage buffer formulation.

1×10^6 U-2 OS were intracellularly stained with 0.25 μ g VPRBP Recombinant antibody (83901-5-RR, Clone:241028B4) and APC-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L)(red), or 0.25 μ g Isotype Control (blue). Cells were fixed and permeabilized with True-Nuclear Transcription Factor Buffer Set. This data was developed using the same antibody clone with 83901-5-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed HeLa cells using VPRBP antibody (83901-5-RR, Clone: 241028B4) at dilution of 1:1000 and CoraLite@488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2), CL594-phalloidin (red). This data was developed using the same antibody clone with 83901-5-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 83901-5-RR against Human VPRBP were performed. The affinity constant is 44 pM.
