Background Information

Alanine-glyoxylate aminotransferase 2-like 1 (AGXT2L1), also called ethanolamine phosphate phospholyase (ETNPPL), is a brain enzyme, so-named after its similarity to AGXT2 (36% sequence identity), that may be involved in the pathogenesis of severe neuropsychiatric disturbances (PMID: 23761375). AGXT2L1 is significantly downregulated in cancerous tissues and may be a tumor suppressor(PMID: 26294768).

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 83984-6-RR (AGXT2L1 antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours.

Biolayer interferometry (BLL) kinetic assays of 83984-6-RR against Human AGXT2L1 were performed. The affinity constant is 5.17 nM.
