For Research Use Only

## CoraLite® Plus 488-conjugated CD155/PVR Recombinant antibody

Catalog Number: CL488-83724-6

**Basic Information** 

Catalog Number: GenBank Accession Number:

CL488-83724-6 NM 027514.2 GeneID (NCBI):

100ul, Concentration: 1000 ug/ml by 52118

Nanodrop: **UNIPROT ID:** 

Source: Q8K094 Rabbit Full Name:

Isotype: poliovirus receptor

IgG Calculated MW:

45 kDa Observed MW: 80 kDa

**Purification Method:** 

Protein A purification

CloneNo.: 240731B1

Recommended Dilutions: IF/ICC 1:50-1:500

Excitation/Emission maxima

wavelengths: 493 nm / 522 nm

**Applications** 

**Tested Applications:** 

IF/ICC

Species Specificity:

mouse

Positive Controls:

IF/ICC: RAW 264.7 cells,

## **Background Information**

CD155, also known as the poliovirus receptor (PVR) or Necl-5, is one of the nectin-like family members, belonging to the Ca2+ independent immunoglobulin superfamily (IgSF) in cell adhesion molecules (PMD: 37660884). CD155 is a type I transmembrane protein composed of three extracellular immunoglobulin-like domains, a transmembrane domain, and a cytoplasmic tail. It is involved in cell-to-cell and cell-to-ECM adhesion (PMID: 32019260; 11437656). CD155 acts as a ligand for immune receptors, including TIGIT, CD96 and CD226, which are expressed on T cells and NK cells. CD155 interacts with these receptors to modulate immune responses, such as T cell activation and NK cellmediated cytotoxicity (PMID: 37660884). CD155 serves as the entry receptor for poliovirus and thereby mediates susceptibility to poliovirus infection (PMID: 15034010).

Storage

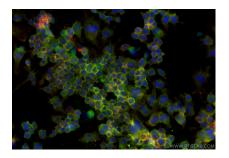

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

## Selected Validation Data

Immunofluorescent analysis of (-20°C Ethanol) fixed RAW 264.7 cells using Coralite® Plus 488 CD155/PVR antibody (CL488-83724-6, Clone: 240731B1) at dilution of 1:200, CL594-Phalloidin (red).
