

For Research Use Only

HRP-conjugated GFP tag Monoclonal antibody

Catalog Number: HRP-66002

6 Publications

Basic Information

Catalog Number: HRP-66002	GenBank Accession Number: U73901	Purification Method: Antigen affinity purification
Size: 100ul , Concentration: 2000 µg/ml by Bradford method using BSA as the standard;	GeneID (NCBI): Full Name:	CloneNo.: 1E10H7
Source: Mouse	Calculated MW: 26 kDa	Recommended Dilutions: WB 1:5000-1:50000
Isotype: IgG2a	Observed MW: -	

Applications

Tested Applications: WB	Positive Controls: WB : Recombinant protein,
Cited Applications: IF, WB	
Species Specificity: recombinant protein, aequorea victoria	
Cited Species: human	

Background Information

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. Green fluorescence protein(GFP) is a protein composed of 238 amino acid residues(26.9kDa) derived from the Jellyfish *Aequorea victoria*, which emits green light(emission peak at 509nm) when excited by blue light(excitation peak at 395nm). GFP has become an invaluable tool in cell biology research, since its intrinsic fluorescence can be visualized in living cells. EGFP contains the double-amino-acid substitutions Phe-64 to Leu and Ser-65 to Thr(previously published as GFPmut1; PMID: 8707053). In contrast to wtGFP, EGFP has a single, strong, red-shifted excitation peak at 488nm. GFPmut1 fluoresces 35-fold more intensely than wtGFP when excited at 488nm, due to an increase in its extinction coefficient(E_m). The antibody recognizes the GFP-tag, eGFP tag, eYFP tag, CFP tag or YFP tag fused to either the amino- or carboxy-terminus of targeted proteins in transfected mammalian cells. This antibody is conjugated with HRP. Note: Do not add Azium (Sodium Azide or Smite) into the dilution buffer. Azium is the HRP inhibitor which decreases the enzymatic activity of HRP.

Notable Publications

Author	Pubmed ID	Journal	Application
Shu-Yi Yang	31659125	Plant Physiol

Storage

Storage:
Store at -20°C. Avoid exposure to light. Stable for one year after shipment.
Storage Buffer:
PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.
Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Recombinant protein were subjected to SDS PAGE followed by western blot with HRP-66002 (GFP tag Antibody) at dilution of 1:10000.
