For Research Use Only

HRP-conjugated Alpha Tubulin Recombinant antibody

Catalog Number: HRP-80762 Featured Product

Basic Information

Catalog Number: GenBank Accession Number:

HRP-80762 BC009314 GeneID (NCBI): Size: 100ul , Concentration: 1000 $\mu g/ml$ by 10376

Nanodrop: **UNIPROT ID:** P68363 Rabbit Full Name:

Isotype: tubulin, alpha 1b IgG Calculated MW: Immunogen Catalog Number: 50 kDa

AG18034 Observed MW: 50-55 kDa

Purification Method:

Protein A purification CloneNo.:

1G7 Recommended Dilutions: WB 1:2000-1:16000

Applications

Tested Applications:

Species Specificity: human, mouse, rat

Positive Controls:

WB: HeLa cells, NIH/3T3 cells, mouse brain tissue

Background Information

There are five tubulins in human cells: alpha, beta, gamma, delta, and epsilon. Tubulins are conserved across species. They form heterodimers, which multimerize to form a microtubule filament. An alpha and beta tubulin heterodimer is the basic structural unit of microtubules. The heterodimer does not come apart once formed. The alpha and beta tubulins, which are each about 55 kDa MW, are homologous but not identical. Alpha tubulin is useful for scientists across fields as an internal control due to its high, ubiquitous expression pattern.

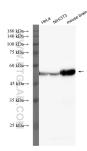

Storage

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with HRP-80762 (Alpha Tubulin antibody) at dilution of 1:8000 incubated at room temperature for 1.5 hours.
