Background

CSPP1 interacts with centrosomes and microtubules and plays a role in cell-cycle progression and spindle organization. CSPP1 is required for their common C-terminal domain to interact with Nephrocystin 8 (NPHP8/RPGRIP1L) and to form a ternary complex with NPHP8 and NPHP4, and for ciliogenesis in hTERT-RPE1 cells in vitro and are expressed in ciliated renal, retinal, and respiratory cells in vivo.

Synonyms

CSPP1, Centrosome and spindle pole-associated prote
