

For Research Use Only

# Streptavidin magnetic beads

Catalog Number: MS001

---

## Description

Streptavidin Magnetic Beads are streptavidin coated magnetic microparticles which have good binding capacity to biotinylated ligand. These beads are optimized for cell separation using biotin conjugated antibodies with a magnet.

## Components

MS001-100: 0.1 mL 10 mg/mL Streptavidin Magnetic Beads  
MS001-1000: 1 mL 10 mg/mL Streptavidin Magnetic Beads

## Package

100  $\mu$ L/1000  $\mu$ L

## Storage

2-8°C

## Beads Diameter

2.7  $\mu$ m

## Validation Data

**Representative example of enrichment and depletion:** Following depletion of CD4 cells, supernatant cell suspension was stained with PB450-CD3(clone: HIT3a) and CL647-CD4(clone: OKT4). CD45+ cells are gated in the analysis. Left panel: CD3+CD4+ cells before selection. Right panel: CD3+CD4+ cells after depletion. Streptavidin... Magnetic beads are tested using PBMC from three different donors.
